Sr. UX Designer - Lvl 6   2020 - Now
Amazon

Senior designer for a Tier 1 AWS Amazon product. Led research and design to define product requirements, deliver end-to-end design features and implement.

Sr. Product Designer   2018 - 2020
Carbon Five

In an Agile XP agency, consulted with a variety of clients ranging from education, fintech to entertainment. Day to day responsibilities focus on full implementation cycle (including exploration) with a heavy emphasis on setting up key rituals of Agile process.

Sr. UX Designer   2017 - 2018
NASA JPL

Worked at NASA JPL's OpsLab to support dozens of missions for robotic space exploration as a design lead. Heavy emphasis on ideation and production execution on mixed reality platforms.

Winner of NASA Software of the Year 2018

UX Designer   2017
Getty Images - Innovation

Conducted design and led research on innovation team. Work ranged from cross-platform mixed reality, stickers, 360 photo editing and machine learning to engage with new consumer audiences.

Introduced service design

UX Designer [Graduate Intern]   2016
NASA JPL

Worked on the Mars 2020 mission operations team. My responsibilities included researching, designing and testing a set of tools that scientists and engineers used to manage tactical rover operations in 2020.

First UX designer embedded on JPL mission
